Bespoke bathtubs - A touch of luxury for your bathroom

CRYSTAL BATHTUBS

PIETRA BIANCA's transparent bathtubs are made of new polymer resin material, which is finely crafted through a special scientific process, incorporating the advanced technology of transparent colour. The polymer resin used by PIETRA BIANCA is an excellent transparent material, smooth and stain-resistant with brilliant colours.

The nature of the material makes the shape and line of the bathtub appear softer. Under direct light and refraction these pieces project an extremely beautiful haze of coloured light.
